Manual

All Terrain

The Velo Bike comes with 12" Compass Air Tyres, for superior traction on all surfaces.

Adapts to Them

An adjustable seat allows the Velo Bike to grow with them.

Room to Rest

A featured foot rest allows them to really practise their balance when they're ready to take the next step.

Lightweight Design

The Velo Bike's lightweight frame means it can be taken on any adventure with ease.

Specifications

Description

For the most adventurous kids.

The Y Velo Kick Bike is new all-terrain balance bike designed for the most adventurous kids that are ready to take their adventure everywhere. The difference from our other models is that the all-terrain wheels can now help your little ones to focus on steering and balance just like the grown-ups.

The all-terrain air tyres help to provide superior traction and shock absorption for a safe and comfy outdoor ride, great for biking over bumpy ground or obstacles. Velo Kick Bike is also super lightweight. The frame is manufactured using gas-assisted plastic injection, meaning the interior of the frame features strategically placed hollow air pockets, reducing product weight while maintaining product strength!
